

## Anti-slip - High performance ANTI-SLIP LATTAM

**ANTI-SLIP LATTAM Arelec Solution** is ideal for fixing to all metal surfaces : paint booths, cold rooms, modular buildings, IPNs, shelving, vehicles, etc.

What's more, its magnetic strength means it can **withstand high speeds**. But its main feature is its rubber coating, which **eliminates slippage** during vertical fixings. ANTI-SLIP eliminates the need to drill holes, makes installation and removal easier and leaves no scratches or marks on your supports.

**High-performance ANTI-SLIP LATTAM** are made up of **neodymium** magnets, entirely coated with an ANTI-SLIP synthetic polymer. There are also several rectangular or cylindrical sizes, for gluing or screwing on depending on the model.

**ANTI-SLIP LATTAM** consists of ferrite magnets bonded to a metal plate and overmoulded with an ANTI-SLIP elastomer. There are several sizes that can be either **glued**, **clipped** or **screwed** on, depending on the model.

Model	Dimensions (mm)*	Typical load-bearing capacity (kg)	Reference	Quantity per small packaging
