

Built-in magnetic catches - IN series

Developed for the furniture industry, these magnets give a neat, attractive finish for all types of furniture. Their ease of installation makes them ideal for mass production. A magnetic fastener provides a fast, efficient solution.

IN North black

IN South Black

IN North white

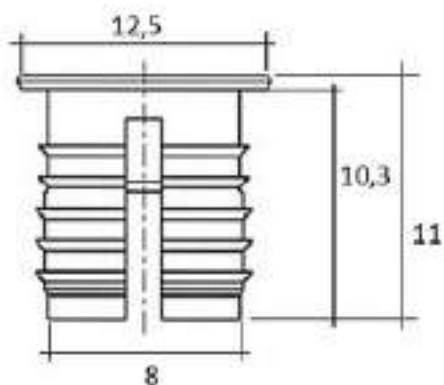

IN South white

The IN series magnetic fasteners are made up of neodymium magnets housed in a polypropylene body. To fix this series of fasteners, they need to be pressed into a pre-drilled hole of a diameter chosen according to the thickness of the panel.

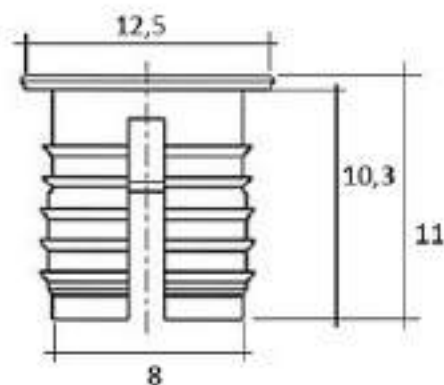

Model	Reference	Color	Dimensions (mm)	Typical load-bearing capacity (kg)	With counterplate	Quantity per smallest packaging
IN 8 North	0171071	Black	Diam 12,5 x 11	0.5	No	450
	0171070	White				
	0171072	Grey				
IN 8 South	0171076	Black	Diam 12,5 x 11	0.5	No	450
	0171075	White				
	0171077	Grey				
IN 10 North	0171078	Black	Diam 14 x 11,7	1.4	No	900
	0171081	White				
	0171083	Grey				
IN 10 South	0171080	Black	Diam 14 x 11,7	1.4	No	900
	0171082	White				
	0171084	Grey				
IN 10 North	0171094	Black	Diam 14 x 11,7	1.4	CP W 12 	900
	0171095	White

Built-in magnetic catches - IS series

Developed for the furniture industry, these closures give a neat, attractive finish to all types of furniture. Their ease of installation makes them ideal for mass production applications. A magnetic fastener provides a fast, efficient solution.

IS black

IS white

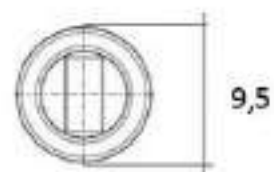

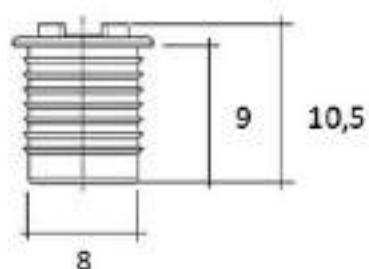

IS brown

The IS series of magnetic closures consists of ferrite magnets housed in a plastic body with a ground front face. To fix this series of fasteners, they must be pressed into a pre-drilled hole of a diameter chosen according to the depth of the panel.

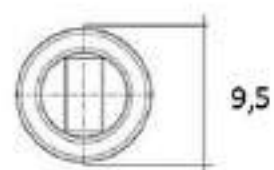

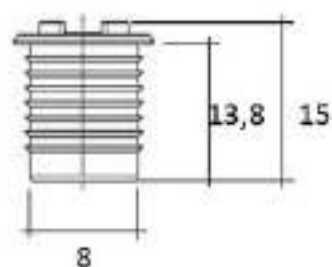

Model	Reference	Color	Dimensions (mm)	Typical load-bearing capacity (kg)	Quantity per smallest packaging
IS 1	0171001	Black	Diam 8 x 10,5	1	2000
	0171002	White			500
IS 2	0171021	Black	Diam 8 x 15	1.5	100
	0171020	White			
	0171022	Brown			
IS 4	0171041	Black	Diam 11 x 15,3	4	1000
	0171040	White			
	0171042	Brown			
IS 6	0171061	Black	Diam 13,5 x 18,3	6	500
	0171060	White			1000
	0171062	Brown

Built-in magnetic catches - TICONAM SUPER X series 7

These magnetic closures are recommended for precision workmanship . They offer excellent attraction from a distance, and the alignment of the poles allows the counterplate to shift slightly.

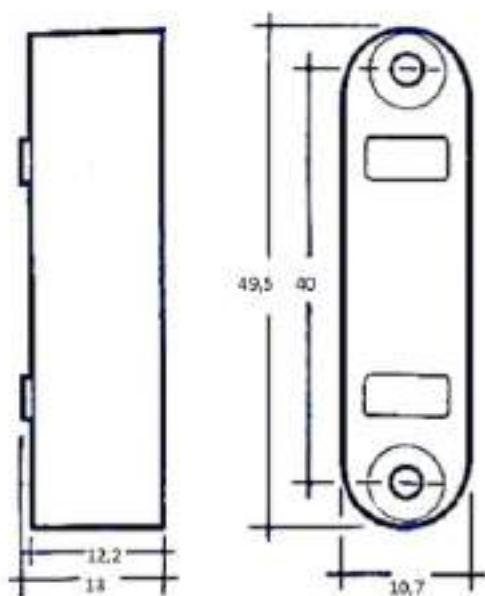

TICONAM SUPER X Series 7 catches have an impact polystyrene body with semi-circular ends. The assembly is held in place with two 3mm-diameter screws.

Model	Reference	Color	Dimensions (mm)	Typical load-bearing capacity (kg)	With counterplate	Quantity per smallest packaging
Junior 17	0102017	White	49,5 x 10,7 x 13	4	1 A	20
	0102018	Brown			No	
Senior 27	0102027	White	53 x 14,2 x 15,5	7	2 A	20
	0102028	Chamois

Built-in magnetic catches - KLIP series

Developed for the furniture industry, these klips give a neat, attractive finish to all types of furniture. Their ease of installation makes them ideal for mass production applications. A magnetic klip provides a fast, efficient solution.

Klip 3 white

Klip 5 black

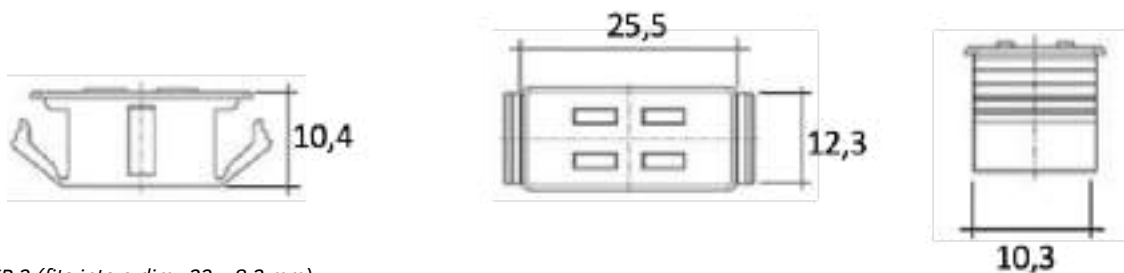

Klip 15 black

The KLIP range of magnetic closures consists of a magnetic circuit housed in a plastic body. The flexible clips are an integral part of the body.

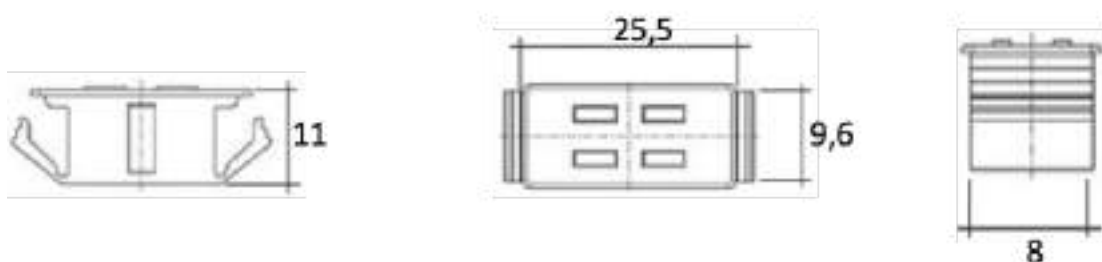

Model	Reference	Color	Dimensions (mm)	Typical load-bearing capacity (kg)	Quantity per smallest packaging
KLIP 2	0217004	White	25,5 x 12,3 x 10,4	1,5	500
	0217010	Black			650
KLIP 3	0217003	White	25,5 x 9,6 x 11	1,8	1000
KLIP 4	0217005	White	25,5 x 12,3 x 10,4	2,5	650
KLIP 5	0217007	White	39,5 x 10 x 11	4	500
	0217006	Black			
KLIP 15	0217015	Black	54 x 12,5 x 14,5	15	20

BUILT-IN MAGNETIC CATCHES KLIP SERIES

 **KLIP 2** (fits into a dim=23 x 11 mm)

 **KLIP 3** (fits into a dim=23 x 8,2 mm)

 **KLIP 4** (fits into a dim=23 x 11 mm)

 **KLIP 5** (fits into a dim= 35 x 8,2 mm)

 **KLIP 15** (fits into a dim= 51,5 x 10,8 mm)

Built-in magnetic catches - F series

Developed for mounting on sheet metal or plastic, these closures can be fitted into narrow uprights. Their low-cost, screwless installation makes them ideal for mass production applications. They are simply clipped on.

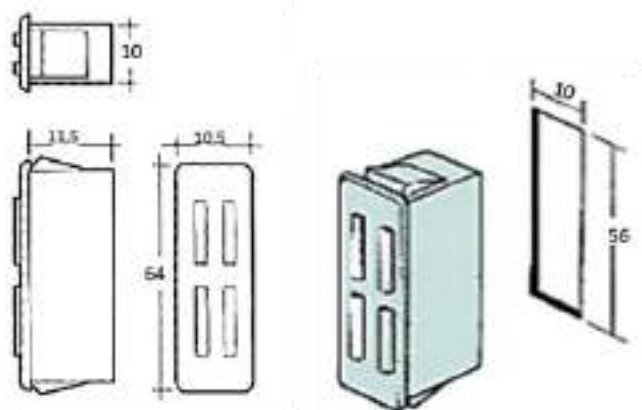

The F series catches have a white shock-absorbing polystyrene body and an acetal resin spring that acts as a shock absorber and keeps the polar weights forward.
