

Magnets pots with hook

Arelec Solution pot magnets have a high specific force and take up very little space. They have very good long-distance attraction and good rocking stability. They are mainly used for hanging or fixing advertising posters, signs, installations, etc. vertically or horizontally.

Rectangular pot magnets

Cylindrical pot magnets

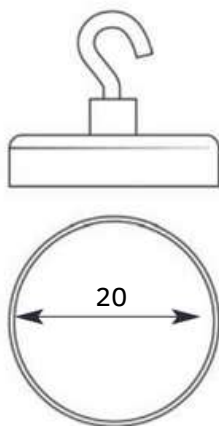

The Arelec Solution pots with hook consists of a ferrite magnet-based magnetic circuit fitted with a hook. There are two types of hook magnets with a wide range of dimensions and magnetic powers :

- Rectangular pot magnets : ferrite magnet overmoulded in white plastic
- Cylindrical pot magnets : ferrite magnet inserted in a white-lacquered mild steel shell

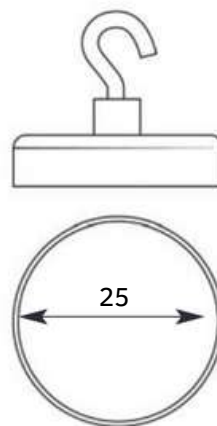

Model	Dimensions (mm)	Thread	Typical load-bearing capacity (kg)	Reference	Quantity per smallest pack
